LETTER

Service Letter No. 480

July 8, 1966

SUBJECT:

F.A.A. Aircraft Specification No. 1A10,
Item 1 (i)

MODELS AFFECTED:

All PA-23-250 and PA-E23-250 Aztec Aircraft
Serial Nos. 27-2505 and up

We have been advised by the F.A.A. that the minimum approved propeller diameter is 76 inches and not 75 inches as stated in the subject aircraft specification. A revision to this specification denoting this change will be issued by the F.A.A.

Propeller blades that have been reworked to a dimensional diameter of less than 76 inches will not meet the revised specification.

PIPER AIRCRAFT CORPORATION, LOCK HAVEN, PA., U. S. A.
